

DUGITE PADLOCKABLE REMOVABLE BOLLARD

General Description:

Dugite Padlockable Removable Bollards protect property and buildings whilst having the flexibility of easy removal for unrestricted access.

Specifications:

Body:

- Galvanized Steel 90x90 RHS with a 5.6mm thick wall

Finish Options:

- Acid etched, Zinc plated then Powder coated White Gloss (Standard)
- Full Dulux powder coat colours available
- Red Reflectors Included

Height Options:

- 850mm above ground level
- Bollard Length 1150mm
- Base Length 500mm
- Custom Heights upon request

Mounting:

- Fixed Base set in concrete 500mm below ground

Method:

- The bollard inserts 300mm into the base until the locking pin can go no further. The hinged lid is closed over the pin to secure the padlock in it's place. Thus the bollard is 850mm above ground. The locking pin is constructed from hardened steel to help prevent from being cut with a hack saw.

Other Options:

- Chains and a range of Master padlocks
- Bollard Storage Stand
